👤 PROFILE

Passionate and Tech-driven Full Stack Developer. Seeking a Full Stack Developer role to leverage technical expertise in creating scalable and user-friendly digital solutions. Comfortable with both frontend and backend technologies, with a keen eye for responsive design and performance optimization.

🧠 SKILLS

- Frontend Development: HTML5, CSS3, JavaScript, React.js (Hooks API, Router, Redux)
- Backend Development: Node.js, Express.js, MongoDB
- Testing & Deployment: RESTful API, OpenAPI/Swagger, Jest, Puppeteer, Cypress.io, Cloud deployment (AWS, Google Cloud, Azure)
- System Design & Development Methodologies: Data Structures, Algorithms, System Design principles, Agile/SCRUM
- Soft Skills - Communication, Team Building, Quick Learning, Taking Initiative

🎓 EDUCATION

Bachelor of Computer Applications

Pursuing from Mangalayatan University online

📁 PROJECTS

Mern Law System [🔗](#)

MERN Law System | Indian Penal Code (IPC) Information Portal

- Developed a comprehensive web application providing easy access to Indian Penal Code sections, enabling users to search and learn about legal offenses and punishments
- Implemented secure admin dashboard for user management and IPC section updates, ensuring content accuracy and system integrity
- Built responsive user interface with React.js for seamless navigation and information accessibility
- Engineered backend architecture using Node.js, Express, and MongoDB to handle data management and API requests efficiently

Food Preference - Survey Form [🔗](#)

Interactive Web-Based Data Collection Tool

Technologies: HTML5, CSS3

Project Description: Developed a responsive web-based survey form to collect food preference data, showcasing front-end development skills with form creation and user input handling.

Key Features:

- Implemented multiple input types with data validation for integrity
- Created structured data collection with organized layout and styling
- Incorporated form functionality including submit and reset options
